October 28, 2025

CLUE #1 -Gather your supplies!

- Designer Series Paper – 5 1/2 x 12, extra for envelope (optional)
- Basic White/Neutral – 4 x 5 1/4, extra for cutting & stamping
- Cardstock – any shape for focal layer
- Envelope
- Ink
- Stamps
- Adhesive
- Embellishments- ribbon, adhesive dots or gems/sequins (*optional)
- Tools – Trimmer/Score Board, Bone Folder
- *Optional – coloring tools, die cut/punch, Cut & Emboss Machine

CLUE #2

*You will see both sides of your Designer Series Paper so make sure both sides coordinate. Score 5 1/2" x 12" Designer Series Paper along the long side @ 2 1/4, 5 1/2, and 9 3/4.

CLUE #3

Fold and burnish as though you are making a Z Fold card. Fold in half at 5 1/2 then fold the 2 1/4 score line back on itself. Open the card and fold the last score line inside of the card. In other words...the last score line folds in first then the front folds over on top then fold back the 2 1/4 score line (like Z fold). When folded your card measures 4 1/4 x 5 1/2 (H). You will see one pattern showcased in the center of your card with 1" of the other pattern showing on each side.

CLUE #4

Stamp & adhere the 4 x 5 1/4 white/neutral cardstock on the inside of the card.
*Make sure to open the inside flap to adhere this piece then fold it over so the inside layer will be partially hidden.

CLUE #5

Create a focal piece for the front of your card. Stamp, punch, die cut, layer, etc.

CLUE #6

Center the focal layer on the card. Adhere only to the center piece so the card opens and stands for display.

CLUE #7

*Optional: You can add a 4 1/4 x 5 1/2 piece of cardstock to the back of the card if you want a sturdier card.(I think the DSP is fine and it stands on it's own.)

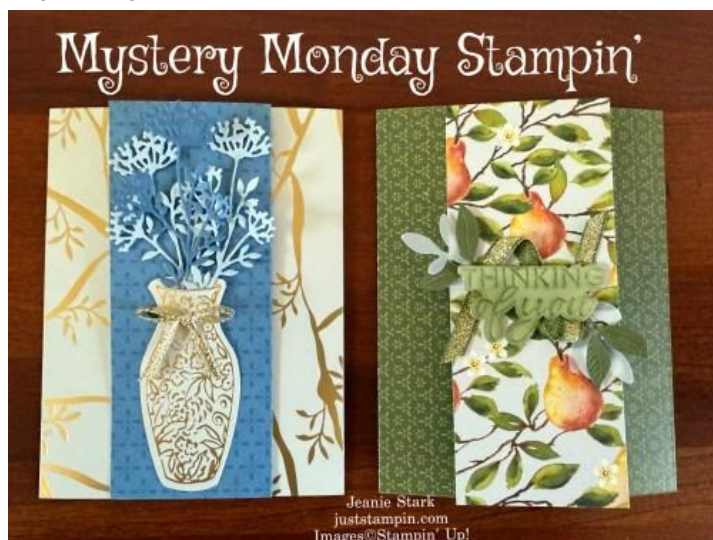

CLUE #8

Does your card need anything else? Embellishments? A sentiment? Add that now.

CLUE #9

Decorate your envelope (stamp/emboss/add DSP) to coordinate with your card.

Mystery Solved!

Z Fold Gatefold Cards
